PROJECTS

WORDLEARNER | [Live project](#)

<https://anshulsahu01.github.io/Wordlearner/>

- Word learner is a platform that helps learners/students a lot in learning English. It is very helpful platform for students who have trouble remembering English word.
- In this, you just have to save the word and its meaning and whenever you want to revise, you can do it through **random algorithm**.
- Tools and technology used : HTML, CSS, JavaScript .
- Live project used by **10-15** friends.
- Responsibility to develop and promote project.

CHAT-APPLICATION | Minor Project

<https://github.com/anshulsahu01/Chat-.git> Nov. 2021 – Jan. 2022 | India

- Designed and implemented a user-friendly chat application, enhancing real-time communication and collaboration among team members.
- Tools and technology used : **React.js**.
- Responsibility : Designing frontend.
